

## **PERFORMANCE PLANTS, INC.**

### **CORN TRANSFORMATION SCIENTIST PERMANENT POSITION AVAILABLE IMMEDIATELY**

A permanent position of corn transformation scientist is immediately available in the Company's Kingston research & product development facility. The candidates for this position should have demonstrated laboratory skills and successful experience in corn tissue culture and regeneration of transgenic events. Successful candidates will work with a team of plant transformation specialists to carry out the company's corn transformation work and maintain a high-throughput transgenic corn pipeline. Experience and knowledge on tissue culture and transformation in other crop systems will be a plus. Applicants for the position should possess a B.Sc. or M.Sc. degree or with equivalent experiences, and have a strong background in plant cell biology. The candidates will ideally be detail-orientated, well-organized, enthusiastic and able to appreciate goal and team-based research and development.

Performance Plants Inc. is a Canadian plant biotechnology company, whose mission is to discover, develop and validate innovative plant technologies that optimize crop performance and agricultural productivity while improving food & fuel security, preserving the environment and promoting global sustainability. The Company's head office is located in the beautiful city of Kingston by Lake Ontario.

Interested applicants should forward their curriculum vitae (including the names of three references) to:
